

mobiVoip - VoIP technology for your mobile device

Call your friends from around
the corner or around the globe
24x7 at competitive rates.

VoIP

"Voice [calling] has just become another piece of data on a network the customer is already paying for. It is the new companies who are going to grow around that network and who will produce the new phone companies."

-- The Guardian, April 2006.

"The emergence of voice over Internet protocol for mobile devices (mobile VOIP) is transforming the telecommunications industry."

-- 'Mobile VOIP Competitive Landscape', ON World, February 2005.

Requirements:

- PalmOS 5.0 or greater
- PalmOne devices - Treo 600/650, Tungsten, LifeDrive, Zire.
- Bandwidth requirement: G711 – 138 kbps and GSM – 36 kbps
- Earphones is required to avoid echo

VOIP, or Voice Over IP (pronounced 'voyp'), is a new technology that lets you make phone calls over the Internet. mobiVoip™ is MantraGroup's™ propriety technology which brings VoIP to Palm devices. When you make a VoIP phone call, you use a normal touch-tone telephone and dial the normal phone number just as you would any other time. The people on the other end can't tell that whether you are calling from a traditional telephone or a VoIP phone. The main difference is that the phone call travels over the Internet rather than through the local phone company's wires. mobiVoip™ takes it to next step allowing you to use your PDA and make VoIP calls.

Listed below are the features available with mobiVoIP v1.0:

- Ability to make PSTN calls over IP!
- Caller-ID [via SIP]
- Secure Account Authentication using SIP MD5 Authentication
- Automatic IP resolution [via STUN servers]
- Detecting Dynamic IP [when STUN is disabled]
- Codecs supported: G.711 and GSM 6.10 FR
- Call Timer [should be Enabled from Debug Prefs]
- Noise Suppression - a great feature to save your bandwidth usage - use your connection only to transmit your voice!
- Touch-tones [DTMF]
- Lookup Phonebook - Dial right from your contacts!
- Recommended Connections - WiFi, Bluetooth, EV-DO
- Treo 600/650 extras - Easy five-way navigation
- non-Treo extras - No worries of network disconnection on device entering sleep mode
- Real time auto-updates.
